

LOGICA LAUNCHES THE SPACE PARTITION SYSTEM EUREKA

PARTITION WALLS, STORAGE AND INTEGRATED WALLS, OPEN-SPACE AND GLASS WALLS TO CREATE EXECUTIVE AND OPERATIVE OFFICES

Tavagnacco, 19th November 2009

Logica, part of the industrial group Interna- world leader in the high-end furnishings for the contract and hospitality sector- presents its latest catalogue, Eureka Space Partition System, that completes, with a system to divide the spaces, the furnishings and chairs for executive and operative offices of the catalogue Logica Office Living presented in April 2009.

It is a complete collection to shape the office areas: partition walls to rationalize the space, storage and integrated walls to organize all the materials of the office, open-space to create work stations in large spaces and glass walls for a transparent partition.

The Eureka system, as the entire Logica production, is focused on the flexibility of the work place: it proposes and implements solutions designed around its clients with materials, finishes and services customized to meet any design requirement.
