Interna Collection announces its participation to the *Salone Internazionale del Mobile* in Milan with a *Fuori Salone* event outside the official exhibition which will definitely be appealing to interior designers, professionals from the contract sector, and, in general, for all design amateurs. Focus of the event is the presentation of a preview of the new monographic designer collection of Interna Collection: "AngloDutch", designed by FG Stijl from Amsterdam, a reference interior design practice at international level in the contract and hospitality sector. A special temporary show-room will be set up in the magnificent halls of the hotel *The Chedi Milan*, first European hotel in Europe of the prestigious international chain GHM, whose impressive interiors, open to visit on the occasion, have been recently realized on a 'turnkey' basis by Interna.

"AngloDutch", which will be fully presented during the 2008 edition of the *Salone Internazionale del Mobile*, follows the first monographic collection of Interna Collection "Les Grands Classiques de Jacques Garcia" launched in 2006. hospitality sector, and are introduced at regular intervals to add a new touch of creativity to the already comprehensive offer of Interna Collection with its three permanent lines, *Traditional, Transitional and Contemporary*. "AngloDutch" derives its name and its features from the two founders of the interior design studio FG Stijl: Colin Finnegan, from the UK, and Gerard Glintmeijer, from the Netherlands. In the collection they merge their cultures of origin in a unique interpretation of furniture and decoration design for the contract and hospitality sectors.

With this collection, Interna further strengthens a long-lasting partnership with FG Stijl: over the past years they have cooperated on top level projects such as the interiors of the College Hotel in Amsterdam, winner of the award 'Best New Hotel Design' 2005, the magnificent Dylan Hotel, also in Amsterdam, and the restaurant Maxime in The Hague. Together they are currently working at the interiors of the futuristic BMW World in Munich, an extraordinary project which is bound to become one of the symbols of contemporary architecture.
